FAU FRIEDRICH-ALEXANDER UNIVERSITÄT ERLANGEN-NÜRNBERG

Modulbezeichnung:	**Scanning Electron Microscopy in Materials Science and Nanotechnology (IMN_M3/4/5/10/11-MWT_M10/11-NT_SEM)** (Scanning Electron Microscopy in Materials Science and Nanotechnology)	**5 ECTS**
Modulverantwortliche/r:	Erdmann Spiecker	
Lehrende:	Thomas Przybilla, Erdmann Spiecker	

Startsemester: WS 2020/2021	Dauer: 1 Semester	Turnus: jährlich (WS)
Präsenzzeit: 60 Std.	Eigenstudium: 90 Std.	Sprache: Deutsch und Englisch

Lehrveranstaltungen:

Rasterelektronenmikroskopie in Materialforschung und Nanotechnologie (WS 2020/2021, Vorlesung, 2 SWS, Erdmann Spiecker et al.)
Übungen zur Rasterelektronenmikroskopie (WS 2020/2021, Übung, 2 SWS, Erdmann Spiecker et al.)

Inhalt:

The module focuses on the introduction to and application of Scanning Electron Microscopy (SEM) in Materials Science and Nanotechnology and comprises a lecture with corresponding exercises. Amongst others, the following topics are addressed:

- Components of an SEM instrument
- Elastic/inelastic electron-probe/sample interactions, interaction volume, generation of secondary and backscattered electrons
- Contrast mechanisms of different detector systems
- Topographic und chemically-sensitive imaging
- Electron diffraction and its application in SEM
- Scanning Transmission Electron Microscopy (STEM)
- Quantitative X-ray spectroscopy
- Focused ion beams (Dual-Beam FIB, He-ion microscopy)
- Preparation-specific challenges
- Application examples

Specific topics are accompanied with suitable exercises (e.g. Monte-Carlo simulations to simulate electron trajectories).

Lernziele und Kompetenzen:

Die Studierenden

Fachkompetenz

Wissen

- Introduction to the basic concepts of and physics behind SEM

Verstehen

- Overview over applications and deeper understanding of SEM and FIB techniques in materials science on the micro- and nanoscale
- Enhancement of knowledge through teaching of current SEM applications and state-of-the-art developments in research

Anwenden

- Application and consolidation of taught contents by SEM-related exercises

Studien-/Prüfungsleistungen:

Scanning Electron Microscopy in Materials Science and Nanotechnology (Prüfungsnummer: 62831)
(englische Bezeichnung: Scanning Electron Microscopy in Materials Science and Nanotechnology)

Prüfungsleistung, mündliche Prüfung, Dauer (in Minuten): 15
Anteil an der Berechnung der Modulnote: 100%
weitere Erläuterungen:
Prüfungssprache nach Wahl der Studierenden
Prüfungssprache: Deutsch oder Englisch

Erstablegung: WS 2020/2021, 1. Wdh.: SS 2021
1. Prüfer: Erdmann Spiecker
