Leadership and communication in a global world (WS 2015/2016, Vorlesung, 2 SWS, N.N.)

Inhalt:

In a more and more global business environment with increasing complexity and speed of change, companies face new challenges nearly every day. These companies are steered by leaders, which is why their role and responsibilities become increasingly demanding as well. To be able to deal with these challenges successfully, leaders need sufficient qualifications and a solid knowledge base. This course gives an introduction and an overview of the principles of people management in an intercultural context. The various aspects of leadership are considered in direct reference to an intercultural context. The challenges for leaders to lead employees with different cultural backgrounds and to create a motivating working environment form the base for understanding the relevant tasks and tools of leadership. In addition, the model of ethic-oriented leadership is introduced as a core concept for sustainable success. A prerequisite for participating in this course is a very good command of the English language. The course - all lectures, as well as all tasks and the exam - will be completely in English. In order to receive the ECTS for this course, participants need to hand in a group task every week (group size 4-6 students), as well as pass the exam at the end of the semester.
