Scientific Writing, Reviewing and Presenting (WS 2022/2023, Vorlesung, 4 SWS, Thomas Seel et al.)

Empfohlene Voraussetzungen:

Participants should have very good command of the English language and should be familiar with common spelling rules. They should have completed at least one scientific project, such as a Bachelor thesis or a similar piece of work.

Inhalt:

This module is concerned with methods and tools for writing scientific papers, reviewing manuscripts and presenting scientific results at conferences. Participants will learn about common procedures and widely accepted standards of scientific practice, they will acquire and further develop skills and expertise that are crucial for successful research work, and they will become familiar with several useful tools for scientific writing, reviewing and presenting. All topics will be presented and discussed openly, and participants will be encouraged to contribute different perspectives and additional aspects. The course work will be largely practical in the sense that all learned concepts are directly applied to selected examples.

Topics include, but are not limited to:

- Basic principles of scientific practice
- How to plan, structure and draft scientific papers
- Plots, figures, and graphical excellence
- Tools for writing and editing papers
- How to write in appropriate language and style
- Writing an example mini paper
- Understanding the peer review system
- How to effectively review scientific manuscripts
- Tools for reviewing and evaluating papers
- Reviewing an example paper
- How to present scientific results in a talk
- Why and how - convince and explain
- Tools for advanced presentation design
- Addon: Systematic and efficient literature review
- Addon: Cover letters, author's response and rebuttals
